

BANYAN TREE
BANGKOK

We strive to create a positive impact wherever we are. As a Group founded with the core value of driving sustainable development by “Embracing the Environment, Empowering People”, Banyan Tree is guided by a holistic and participatory approach to minimising impacts, as well as safeguarding and enhancing our human and physical environment. We work with the world’s leading scientific benchmarking and certification group EarthCheck to measure our energy, emissions, water, waste and paper use; chemical and pesticide use.

For our guests, meeting at Banyan Tree hotels and resorts means enjoying energy-efficient buildings that draw on vernacular architectural styles and use locally-sourced materials – a concept underpinned by well-planned waste management systems and a values-based supply chain. They also benefit from our Meet for Good programme that seeks to inspire and motivate guests by connecting them to local communities and environments through exceptional experiences.
